**BIROTICS.
Spreadsheet processing.
Microsoft EXCEL**

SECOND REVISED EDITION

**Bacău
2016**

CONTENT

Part I. Spreadsheet Processing	15
1.1. Historical development of spreadsheet processing	15
1.2. General features of spreadsheet packages	15
1.3. Guidelines for selecting a spreadsheet package	16
1.4. Applicability of spreadsheet packages	17
1.5. Spreadsheet format	18
1.6. Data types	21
1.6.1. Numeric data	21
1.6.2. Character data	21
1.7. Arithmetic operations	22
1.8. Functions of spreadsheets	22
1.8.1. Getting help	22
1.8.2. Moving around in the spreadsheet	22
1.8.3. Titles and labels	24
1.8.4. Blanking cells	25
1.8.5. Numeric values and formulas	25
1.8.6. Formatting	26
1.8.7. Inserting and deleting	28
1.8.8. Copying data	29
1.8.9. Moving data	29
1.8.10. Windows	29
1.8.11. Sorting	29
1.8.12. Functions	30
1.8.13. Recalculation	31
1.8.14. Printing	31
1.8.15. File handling	31
1.8.16. Integration with other software	32
1.8.17. Computer graphics in spreadsheet packages	32
1.9. Functions of business graphics. Charting and chart selection. Scaling. Drawing and painting. Labeling.	31
1.10. Comparison of spreadsheet packages	32
Part II. Microsoft Excel 2003	35
2.1. Installing Excel	35
2.2. Starting and quitting Microsoft Excel	35
2.3. Opening a workbook	37
2.4. Scrolling through the worksheet	37

2.5. Entering and editing data	37
2.6. Building formulas to calculate values	38
2.7. Managing lists of data	39
2.8. Formatting data	39
2.9. Creating charts	40
2.10. Printing	40
2.11. Saving the workbook	41
Part III. Lotus 1-2-3	42
3.1. Productivity Features	42
3.2. Internet Integration	43
Part IV. Excel 2010. Laboratories	44
Laboratory work No. 1. Excel Formulas tutorial!	44
1.The Excel interface	44
2.Working with your Excel environment	44
3.The Ribbon	45
4.To customize the Ribbon	45
5. To minimize and maximize the Ribbon	46
6. The Quick Access Toolbar	47
7. To add commands to the Quick Access Toolbar	47
8. Backstage view	47
9. Options	49
10.Help	49
11.Print	50
12.New	50
13.Info	51
14.Recent	51
15. Creating and opening workbooks	51
15.1. To create a new, blank workbook	51
15.2. To open an existing workbook	52
16. Compatibility mode	53
17. To convert a workbook.	54
Laboratory work No. 2. Excel 2010. Cell Basics	56
1. Introduction to cells and cell content	56
2. The cell	56
3. To select a cell	57
4. To select multiple cells	57
5. Cell content	57
6. To insert content	57
7. To delete content within cells	58
8. To delete cells	58
9. To copy and paste cell content	59
10. To cut and paste cell content	59

11. To access more paste options	60
12. To access formatting commands by right-clicking	61
13. To drag and drop cells	61
14. To use the fill handle to fill cells	62
Laboratory work No. 3. Excel 2010. Modifying Columns, Rows, and Cells	64
1. To modify column width	64
2. To set column width with a specific measurement	64
3. To modify the row height	65
4. To set row height with a specific measurement	66
5. To insert rows	67
6. To insert columns	68
7. To delete rows	70
8. To delete columns	71
9. Wrapping text and merging cells	72
10. To merge cells using the Merge & Center command	73
11. To access more merge options	74
Laboratory work No. 4. Excel 2010. Formatting Cells	76
1. Formatting text	76
2. To change the font	76
3. To change the font size	76
4. To use the bold, italic, and underline commands	77
5. To add a border	77
6. To change the font color	78
7. To add a fill color	78
8. To change horizontal text alignment	79
9. To change vertical text alignment	79
10. Formatting numbers and dates	80
Laboratory work No. 5. Excel 2010. Saving	82
1. Saving workbooks	82
2. To use the Save As command	82
3. To use the Save command	83
4. To use AutoRecover	83
Laboratory work No. 6. Excel 2010. Creating Simple Formulas	86
1. Simple formulas	86
2. Creating simple formulas	86
3. To create a simple formula in Excel	86
4. Creating formulas with cell references	87
5. To create a formula using the point-and-click method	88
6. To edit a formula	89
Laboratory work No. 7. Excel 2010. Worksheet Basics	91
1. Introduction to worksheets	91
2. To rename worksheets	91
3. To insert new worksheets	92

4. To delete worksheets	92
5. To copy a worksheet	93
6. To move a worksheet	93
7. To color code worksheet tabs	94
8. Grouping and ungrouping worksheets	94
8.1. To group worksheets	94
8.2. To ungroup all worksheets	95
9. Freezing worksheet panes	95
9.1. To freeze rows	95
9.2. To freeze columns	96
9.3. Select freeze panes	97
9.4. To unfreeze panes	97
Laboratory work No. 8. Excel 2010. Printing	99
1. Printing	99
2. To view the Print pane	99
3. To print active sheets	100
4. To print the entire workbook	100
5. To print a selection or set the print area	101
6. To change page orientation	102
7. To fit a worksheet on one page	103
8. To modify margins while in Print Preview	103
9. To use Print Titles	104
10. To insert a break	105
Laboratory work No. 9. Excel 2010. Creating complex formulas	107
1. Complex formulas	107
2. Order of operations	107
3. To create a complex formula using the order of operations	108
4. Working with cell references	109
5. Relative references	109
6. To create and copy a formula using relative references	109
7. Absolute references	110
8. To create and copy a formula using an absolute reference	110
Laboratory work No. 10. Excel 2010. Working with basic functions	113
1. Basic functions	113
2. The parts of a function	113
3. Working with arguments	113
4. Using AutoSum to select common functions	114
5. Function Library	115
6. To insert a function from the Function Library	116
7. The Insert Function command	118
Laboratory work No. 11. Excel 2010. Sorting Data.	121
1. Basic sorting	121
2. To sort in alphabetical order	121

3. To sort by date or time	123
4. To sort in the order of your choosing	123
5. To sort by cell color, font color, or cell icon	126
6. Sorting multiple level	127
6.1. To add a level	127
6.2. To change the sorting priority	128
Laboratory work No. 12. Excel 2010. Outlining Data.	130
1. Outlining data	130
2. To outline data using Subtotal	130
3. Showing or hiding data	132
4. To view groups by level	133
5. To ungroup data	134
6. To ungroup data and remove subtotaling	135
7. To create and control your own group	136
Laboratory work No. 13. Excel 2010. Filtering Data.	139
1. Filtering data	139
2. To filter data	139
3. To add another filter	142
4. To clear a filter	143
5. To filter using search	143
6. To use advanced text filters	145
7. To use advanced date filters	146
8. To use advanced number filters	147
Laboratory work No. 14. Excel 2010. Formatting Tables	149
1. Formatting Tables	149
2. To format information as a table	149
3. Modifying tables	151
4. To change the table style	152
5. To change table style options	152
Laboratory work No. 15. Excel 2010. Reviewing and Sharing Workbooks	154
1. Tracking changes	154
2. About Track Changes	154
3. To turn on Track Changes	154
4. To turn off Track Changes	155
5. To add a comment	156
6. To edit a comment	157
7. To delete a comment	158
8. To accept or reject changes	158
9. To list changes on a separate worksheet	160
10. To show or hide comments	160
11. Finalizing and protecting your workbook	161
12. To check spelling	161
13. To use the Document Inspector	162

14. Protecting your workbook	163
Laboratory work No. 16. Excel 2010. Using Templates	166
1. Using templates	166
2. To create a new workbook using a template	166
Laboratory work No. 17. Excel 2010. Working with Charts	169
1. Charts	169
2. Types of charts	169
3. Identifying the parts of a chart	173
4. To create a chart	173
5. Chart tools	175
6. To change the chart type	175
7. To switch row and column data	176
8. Select the chart	176
9. To change the chart layout	177
10. To change the chart style	178
11. To move the chart to a different worksheet	179
Laboratory work No. 18. Excel 2010. Working with Sparklines	180
1. Creating sparklines	180
2. Types of sparklines	180
3. Why use sparklines?	180
4. To create sparklines	180
5. To show points on the sparkline	182
6. To change the style	183
7. To change the sparkline type	183
8. Changing the display range	184
Laboratory work No. 19. Excel 2010. Using Conditional Formatting	186
1. Conditional formatting	186
2. To create a conditional formatting rule	186
3. Conditional formatting presets	187
4. To use preset conditional formatting	188
5. To remove conditional formatting rules	188
Laboratory work No. 20. Excel 2010. Creating PivotTables	190
1. Using PivotTables to answer questions	190
2. To create a PivotTable	191
3. To add fields to the PivotTable	192
4. Pivoting data	192
5. To change the Row Labels	193
6. To add Column Labels	193
7. Report filters	194
8. To add a report filter	194
9. Slicers	195
10. To add a slicer	195
11. Using the slicer	196

12. PivotCharts	196
Laboratory work No. 21. Excel 2010. Using What-If Analysis	199
1. What-if analysis	199
2. Goal Seek	199
3. To use Goal Seek (Example 1)	199
4. To use Goal Seek (Example 2)	201
5. To insert the PMT function	202
6. To use Goal Seek to find the interest rate	203
7. Other types of what-if analysis	204
Supplementary Laboratories	206
Laboratory work No. 22. About Excel 2010. Merging copies of a shared workbook	206
1. To add the Compare and Merge Workbooks command	206
Laboratory work No. 23. About Excel 2010. What are Reference Styles?	208
1. To turn off the R1C1 reference style	208
2. More resources	209
Annex 1. Excel Formulas	210
Annex 2. Excel 2013, Buying Office 2013,	211
Annex 3. OneDrive and Office Online	213
Annex 4. Google Sheets	216
Excel Glossary	218
MS Excel Tests	223
Bibliography	233
