

DOCTORAL STUDIES SCHOOL DAYS
INNOVATION AND DOCTORAL RESEARCH

10th -12th May 2023

The Doctoral Studies School Days, organized by "Vasile Alecsandri" University of Bacău, in collaboration with partner institutions from the country and abroad, is an event that aims to bring into debate aspects of innovative doctoral research, thus stimulating scientific performance by integrating research results in national and international networks of excellence. Bringing together doctoral students, young researchers and experts from the fields of engineering, social and human sciences, the Doctoral Studies School Days aim to create a framework conducive to discussions on exploratory research and exchanges of academic best practices, which are premises for the development of partnerships and complex projects.

Doctoral students are invited to present their doctoral research in the form of oral presentations or posters, in English, French or Romanian. The "Innovation and Doctoral Research" program of scientific events organized within the Doctoral Studies School Days will include plenary sessions, workshops, round tables, etc.

Paper proposals can be registered in one of the following sections:

A. ENVIRONMENTAL ENGINEERING

- Axis 1:** Modern methods and techniques applied in environmental depollution: water treatment, noise depollution, modeling of environmental factors - sustainable development;
Axis 2: Obtaining eco-compatible new compounds/materials with industrial applications.

B. INDUSTRIAL ENGINEERING

- Axis 1:** Innovative strategies of experimental design;
Axis 2: Advanced materials/ methods for the testing and determination of mechanical characteristics.

C. PHILOLOGY

- Axis 1:** Spaces, cultures and languages;
Axis 2: Literature and identity.
